Unsure? Book in for a Skin Assessment with our Cosmetic Dermal Therapist today.

Introducing Dermal Stamping

Electronic Dermal Stamping is revolutionary in skin rejuvenation and scar remodeling. Similar to skin needling, microscopic needles rapidly puncture the skins surface to stimulate collagen growth and massively improve product delivery. Your skin will

start to regenerate, plumping up the skins layers and removing imperfections, for gradual and long lasting results. This laser free treatment is perfect for all skin colours, including dark skin types prone to pigmentation.

**Introductory Special
\$270 SAVE \$70**

Our full face treatment is designed as a complete facial treatment and includes topical anaesthetic:

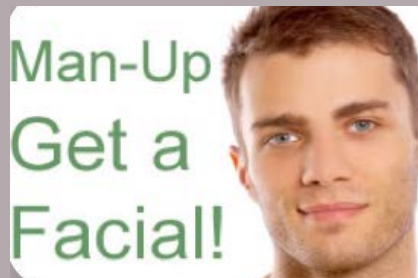

- + Targeted, multi-depth Dermal Stamping
- + Choice of corrective antioxidant serum infusion:
Hydrate - Age Intervention - Brighten
- + Cold Therapy Mask to reduce redness and swelling
- + Nourishing protective balm
